INTRODUCTION

Kentucky Occupational Safety and Health Program KRS 338

The Kentucky Safety and Health (OSH) Program, under the statutory authority of Kentucky Revised Statutes (KRS) Chapter 338 and through a state plan approved by the U.S. Department of Labor, Occupational Safety and Health Administration (OSHA), exercises jurisdiction for enforcement, on-site consultation, standards promulgation, and training services related to workplace safety and health. Enforcement activities and voluntary compliance services are extended to both the public and private sectors in Kentucky with the exception of employees of the federal government and employers under the authority of federal agencies other than OSHA, such as the Mine Safety and Health Administration or the Federal Railroad Administration. OSHA retains jurisdiction in Kentucky for private sector maritime activities as well as for Tennessee Valley Authority employment, military bases, and other properties ceded to the U.S. government.

Kentucky SOII Survey

The Statistical Services Branch conducts an annual survey of occupational injuries and illnesses from approximately 4,200 companies (private and public). The type of data collected in this survey includes annual average employment, total hours worked and injury and illness totals for the state of Kentucky. Demographic data and case characteristics are provided for cases that involve one day or more away from work. This survey is a random sample survey that is conducted in conjunction with the federal Bureau of Labor Statistics. The results are published each year by the Division of Education and Training, and data is merged with national statistics to formulate incidence rates on a national level as well. The publication includes the top 10 hazardous industries in Kentucky, and comparisons between Kentucky and national data.

This is a survey that is designed to provide an estimate of the number of work related injuries and illnesses and a measure of the frequency (rate) at which they occur. For more serious cases, those that involve one or more days away from work, it also provides a description of the injury or illness circumstances as well as the characteristics of the affected workers.

Benefits of SOII Data

The data is used to identify and correct hazards in the workplace. National and State policy makers use the survey as an indicator of the occupational safety and health conditions across industries and kinds of workers. The Occupational Safety and Health Administration uses the statistics to help determine where additional measures are needed to improve safety programs and to measure the effectiveness of the 1970 act in reducing work-related

injuries and illnesses. Both labor and management use the estimates to design and evaluate safety programs. Other users include insurance carriers involved in workers' compensation, industrial hygienists, manufacturers of safety equipment, researchers, and others concerned with job safety and health.

TECHNICAL NOTES

Scope of the Survey

The BLS survey collected data from employers in the following industries in the state of Kentucky: agriculture, forestry, fishing, and hunting; oil and gas extraction (in the mining industry); construction, manufacturing, wholesale trade, retail trade, transportation and warehousing, utilities, information, finance and insurance; real estate and rental and leasing; administrative and support and waste management and remediation services; educational services; health and social assistance; arts, entertainment, and recreation; accommodation and food services; other services; and public administration. All employees, e.g., part-time, full-time, casual, etc., in these industries are covered. Excluded were self-employed individuals, farms with less than 10 employees and the federal government. Questionnaires were mailed or e-mailed to 4,200 establishments. Although not collected using the BLS survey instrument, data for employers covered by the Coal Mine Health and Safety Act and the Metallic and Nonmetallic Mine Safety Acts were provided to this publication by the Mine Safety and Health Administration. Data on railroad employers was provided to this publication by the Federal Railroad Administration, U.S. Department of Transportation.

Sample Design

A weighted sample was selected by the Bureau of Labor Statistics to represent all industries, size classes, and geographic locations in Kentucky with the exceptions noted above. Industries were developed using the 2012 North American Industry Classification System (NAICS) Manual published by the Office of Management and Budget. The injury and illness data for all units in each industry-employment size group were expanded by the inverse of the sampling ratio and benchmarked to the appropriate employment level in each industry to obtain the estimates. A benchmark factor was derived for each estimating cell by dividing the universe employment by the weighted employment derived from the sample. This factor serves to adjust for births and deaths in the universe within each industry-employment-size cell.

Instructions for computing an incidence rate

Incidence rates for an individual establishment or firm may be calculated by employers using the same formula as that used to calculate industry-wide incidence rates from the BLS Survey of Occupational Injuries. By so doing, an employer may compare his own work injury and illness experience to the overall experience of his industry in Kentucky. This formula uses a constant figure of 200,000, which represents the number of hours worked per 100 full-time equivalent workers. In the formula use, the total hours worked by all categories of employees, full time, part time, seasonal, etc. during the time period you wish to study. This should correspond with the case count time period. (month, year).

The formula for computing the incidence rate is as follows:

$$\frac{\text{Count of cases} \times 200,000}{\text{Hours Worked}} = \text{Incident Rate}$$

REFERENCE TABLES

Summary Data

The BLS Survey of Occupational Injuries and Illnesses collected data recorded on OSHA's form 300, Log of Work-Related Injuries and Illnesses from employers in the sample. For calendar year 2016 the number of cases reported on the Log is shown as an incidence rate, and as a count of cases.

Case Type

TRC- Total recordable cases

DART- Days away from work, job transfer, or restriction cases.

DAFW- Days away from work cases.

DJTR-Days of job transfer or restriction only cases.

ORC- other recordable cases beyond first aid.

Case Data

Employers in the survey were asked to submit additional information for each case that was serious enough for the employee to miss days from work. The data on these forms provided the information for the remainder of the tables in this section of the publication. Each injury or illness became part of a database containing the following characteristics:

- Physical condition, or nature of injury or illness (cut, sprain, fracture)
- Part of the body affected by the condition
- Source of injury or illness-the object, substance, exposure, or bodily motion that directly produced or inflicted the condition
- Type of event or exposure associated with the injury or illness-that is, how the condition was inflicted or produced (struck by an object, fall, bodily motion)
- Occupation of the person
- Race
- Age
- Hire date
- Gender
- Time of event
- Number of days missed per case

Tables are available on request or through the [website www.bls.gov/iif](http://www.bls.gov/iif)

SOII 2018 Summary

The SOII 2016 data from the Bureau of Labor Statistics reported the lowest incident rate for nonfatal occupational injuries and illnesses in the state's history.

Kentucky's rate improved from 3.7 in 2015 to 3.4 in 2016 - reflecting the most recent data available. This rate has steadily declined since it was first calculated in 1997, when a rate of 8.4 was reported.

Five sectors in the Commonwealth saw significant improvements in industry-specific incident rates. Comparing data from 2014 and 2015, Cement and Concrete Product Manufacturing improved by 9.8 points; Sawmill and Wood Preservation improved by 9.2 points; Nonmetallic Mineral Product Manufacturing improved by 5.6 points; Wood Product Manufacturing improved by 2.0 points; and, Machine Shops improved by 4.0 points.

Kentucky Businesses Set All-Time Low Occupational Injury Rate

Jarrad Hensley Jarrad.Hensley@ky.gov 502-564-3219

Frankfort, Ky. (Jan. 23, 2017)-According to a recent [report](#) from the U.S. Bureau of Labor Statistics (BLS), Kentucky employers reported the lowest incident rate for nonfatal occupational injuries and illnesses in the state's history.

Based on a mathematical calculation that describes the number of recordable incidents per 100 full-time employees, Kentucky's rate improved from 3.8 in 2014 to 3.7 in 2015—reflecting the most recent data available. This rate has steadily declined since it was first calculated in 1996, when a rate of 8.4 was reported.

"Improving workplace safety for all 1.9 million workers in the Commonwealth is the Labor Cabinet's top priority," Labor Secretary Derrick Ramsey stated. "While setting an all-time low for the number of workplace injuries and illnesses is an important feat, it is also important that we stay steadfast in our mission to make the Commonwealth the safest place to work and do business in the country. We want every Kentuckian to go home safe and sound at the end of a day's work, and maintaining a culture of workplace safety is an important foundation to accomplish Gov. Bevin's goal of making Kentucky the engineering and manufacturing hub of excellence in the nation."

According to the BLS report, approximately 2.9 million nonfatal workplace injuries and illnesses were reported nationally by private industry employers in 2015—resulting in 48,000 fewer injuries from the prior year. This produced a national injury and illness rate of 3.0.

Five sectors in the Commonwealth saw significant improvements in industry-specific incident rates. Comparing data from 2014 and 2015, *Cement and Concrete Product Manufacturing* improved by 9.8 points; *Sawmill and Wood Preservation* improved by 9.2 points; *Nonmetallic Mineral Product Manufacturing* improved by 5.6 points; *Wood Product Manufacturing* improved by 2.0 points; and, *Machine Shops* improved by 4.0 points.

The Labor Cabinet's Division of Occupational Safety & Health Education & Training leads the Cabinet's proactive efforts to create safe and healthful workplace conditions. This includes providing free consultative services to employers across Kentucky on ways to increase workplace safety – including how to improve injury and illness rates. Services include free on-site consultations to small employers, as well as other compliance assistance, educational materials, and class-style and online training for all employers.

Last year, the Division conducted 334 consultative surveys identifying and ensuring the abatement of 3,154 serious hazards. Also, 129 training courses were conducted, reaching approximately 4,400 attendees in response to training requests from employers.

Employers and employees all across Kentucky and the nation have access to cost-free safety and health eLearning programs on the Labor Cabinet's eTrain website. Since the launch of this program, 135,000 participants have utilized this service. This free initiative saves employers money and reduces workplace injuries. Consultants from state agencies or universities work with small and medium-sized businesses to identify workplace hazards, provide advice on compliance with OSHA standards, and help employers establish injury and illness prevention

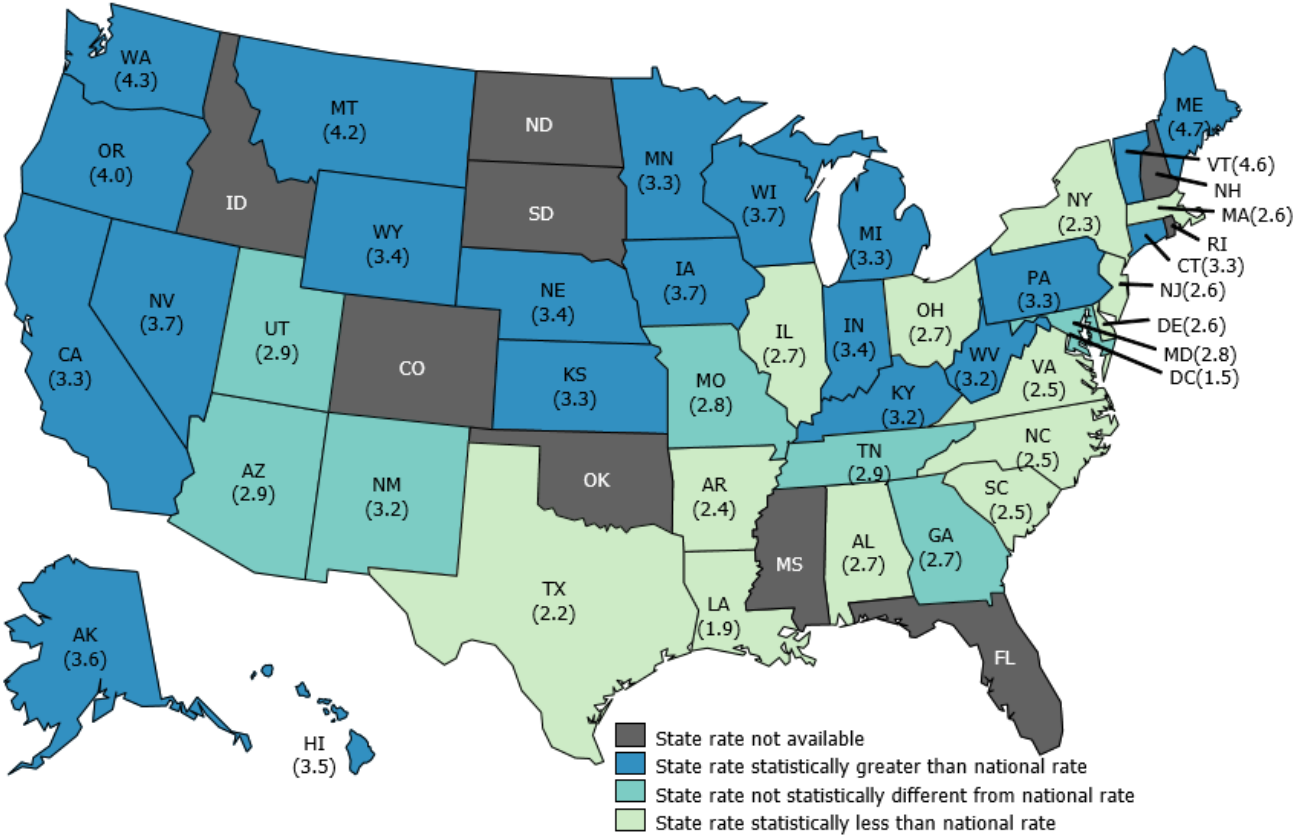

programs.

In addition to these training and education programs, the Division of Compliance is responsible for the enforcement of safety and health standards. Compliance officers inspect workplaces for hazardous conditions and issue citations where violations of standards are found. Inspections may be the result of regular scheduling, imminent danger reports, fatalities, and worker complaints or referrals. Overall, both the education and enforcement responsibilities of the Cabinet comprise a comprehensive goal to "Plan, Prevent and Protect" Kentucky's workforce.

Follow the Kentucky Labor Cabinet on [Facebook](#) and [Twitter](#) for all the latest updates.

National Incidence Rates

State nonfatal occupational injury and illness incident rates, Private Industry 2016

Note: Total recordable case (TRC) rate per 100 full-time workers
 Note does not include Public

Emphasis Programs

In an effort to address high hazard industry issues, the Division of OSH Education and Training uses the data from the Bureau of Labor Statistics, Survey of Occupational Injury and Illness report to target employers in the industries with the highest injury and illness rates. The graphs below represent industries that were selected by the Division of OSH Education and Training in emphasis outreach programs.

Kentucky Incidence Rate Trend

1 The incidence rates represent the number of injuries and illnesses per 100 full-time workers and were calculated as: (N/EH) x 200,000, where

N = number of injuries and illnesses

EH = total hours worked by all employees during the calendar year

200,000 = base for 100 equivalent full-time workers (working 40 hours per week, 50 weeks per year)

2 Totals include data for industries not shown separately.

3 North American Industry Classification System -- United States, 2012

4 Days-away-from-work cases include those that result in days away from work with or without job transfer or restriction.

5 Excludes farms with fewer than 11 employees.

6 Data for Mining (Sector 21 in the North American Industry Classification System -- United States, 2012) include establishments not governed by the Mine Safety and Health Administration rules and reporting, such as those in Oil and Gas Extraction and related support activities. Data for mining operators in coal, metal, and nonmetal mining are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor. Independent mining contractors are excluded from the coal, metal, and nonmetal mining industries. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore, estimates for these industries are not comparable to estimates in other industries.

7 Data for mining operators in this industry are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor. Independent mining contractors are excluded. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore, estimates for these industries are not comparable to estimates in other industries.

8 Data for employers in railroad transportation are provided to BLS by the Federal Railroad Administration, U.S. Department of Transportation.

NOTE: Because of rounding, components may not add to totals. Dash indicates data do not meet publication guidelines.

1 Totals include data for industries not shown separately.

2 North American Industry Classification System -- United States, 2012

3 Days-away-from-work cases include those that result in days away from work with or without job transfer or restriction.

4 Excludes farms with fewer than 11 employees.

5 Data for Mining (Sector 21 in the North American Industry Classification System -- United States, 2012) include establishments not governed by the Mine Safety and Health Administration rules and reporting, such as those in Oil and Gas Extraction and related support activities. Data for mining operators in coal, metal, and nonmetal mining are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor. Independent mining contractors are excluded from the coal, metal, and nonmetal mining industries. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore, estimates for these industries are not comparable to estimates in other industries.

6 Data for mining operators in this industry are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor. Independent mining contractors are excluded. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore, estimates for these industries are not comparable to estimates in other industries.

7 Data for employers in railroad transportation are provided to BLS by the Federal Railroad Administration, U.S. Department of Transportation.

8 Data too small to be displayed.

NOTE: Because of rounding, components may not add to totals. Dash indicates data do not meet publication guidelines.

2018

CENSUS OF OCCUPATIONAL INJURIES

(CFOI)

INTRODUCTION

The Census of Fatal Occupational Injuries (CFOI) program was developed by the U.S. Department of Labor, Bureau of Labor Statistics (BLS) to compile a comprehensive, accurate, and timely measure of fatal work injuries that occur during the year.

The CFOI program is a Federal/State cooperative program. The program was expanded to include all 50 states and the District of Columbia in 1992. This is Kentucky's 27th year participating in the program.

The CFOI program currently includes private sector, public sector, military, self-employed, and certain volunteers. To be included in this report, the incident leading to the fatality must have occurred in the reference state (Kentucky) during the reference year (2017), and the fatality must be work-related according to the CFOI guidelines.

Many of these fatalities involve workers not covered under the jurisdiction of Federal or State agencies engaged in consultation-related, prevention-related, or regulatory activities in safety and health. Among these workers are the self-employed, laborers on small farms, and certain government employees. Thus, CFOI data, which covers these workers may differ from data obtained through other administrative sources.

Timely information on all fatal occupational injuries were compiled from a variety of administrative sources including death certificates, motor vehicle traffic accident reports, medical examiners reports, newspaper articles, Kentucky and Federal Worker's Compensation reports and other governmental investigative reports. Each fatality was substantiated by at least two independent source documents or one source document and a follow-up questionnaire to the employer or other contact (excluding relatives) that had knowledge about the circumstances of the incident.

The Kentucky CFOI program provides useful data for identifying hazardous industries, occupations, activities, and equipment involved in work-related fatalities. The CFOI program gives both public and private stakeholders and analysts' information that will lead to safer working conditions.

CFOI SUMMARY

1. The number of Occupational Fatalities in Kentucky was 92 in 2016
2. The two largest categories for fatal events in there state were, transportation with 47 deaths and contact with objects and equipment with 19 deaths.
3. The industries experiencing the most fatalities were Trade, Transportation and Utilities (23 fatalities), Natural Resources and Mining (18 fatalities), Agriculture, Forestry, Fishing and Hunting (16 fatalities) and Construction (12 fatalities).
4. The age range with the highest number of fatal occupational injuries was 55-64 years with 24 fatalities.
5. The race or ethnic group with the highest number of fatalities was White (non-Hispanic) with 82 deaths.
6. The largest category of primary source was vehicles, accounting for 29 fatalities.
7. Of the 92 fatalities in 2016, 85 were men and 7 were women.
8. In 2016 there were 6 homicides
9. In 2016, there were 9 fatalities in the government sectors, 3 being in state government.
10. Of the 92 fatalities in Kentucky 23 were self-employed.

(1) Based on the BLS Occupational Injury and Illness Classification System (OIICS) 2.01 implemented for 2011 data forward.

(2) May include volunteers and workers receiving other types of compensation.

(3) Includes self-employed workers, owners of unincorporated businesses and farms, paid and unpaid family workers, and may include some owners of incorporated businesses or members of partnerships.

(4) Persons identified as Hispanic or Latino may be of any race. The race categories shown exclude data for Hispanic and Latino workers.

(5) CFOI has used several versions of the Standard Occupation Classification (SOC) system since 2003 to define occupation. For more information on the version of SOC used in this year, see our definitions page.

(6) Includes fatal injuries to persons identified as resident armed forces regardless of individual occupation listed.

(7) CFOI has used several versions of the North American Industry Classification System (NAICS) since 2003 to define industry. For more information on the version of NAICS used in this year, see our definitions page.

(8) Includes all fatal occupational injuries meeting this ownership criterion across all specified years, regardless of industry classification system.

(9) Includes fatal injuries at all establishments categorized as Mining, quarrying, and oil and gas extraction (Sector 21) in the North American Industry Classification System, including establishments not governed by the Mine Safety and Health Administration (MSHA) rules and reporting, such as those in Oil and Gas Extraction.

Note: Totals for major categories may include subcategories not shown separately. Blank cells indicate no data reported or data that do not meet publication criteria. CFOI fatality counts exclude illness-related deaths unless precipitated by an injury event.

¹ CFOI has used several versions of the North American Industry Classification System (NAICS) since 2003 to define industry. For more information on the version of NAICS used in this year, see our definitions page at <http://www.bls.gov/iif/oshcdef.htm>.

² Based on the BLS Occupational Injury and Illness Classification System (OIICS) 2.01 implemented for 2011 data forward.

³ Includes violence by persons, self-inflicted injury, and attacks by animals.

⁴ Includes roadway, nonroadway, air, water, rail fatal occupational injuries, and fatal occupational injuries resulting from being struck by a vehicle.

⁵ Includes fatal injuries at all establishments categorized as Mining (Sector 21) in the North American Industry Classification System, including establishments not governed by the Mine Safety and Health Administration (MSHA) rules and reporting, such as those in Oil and Gas Extraction.

⁶ Includes fatal injuries to workers employed by governmental organizations regardless of industry.

Note: Data for all years are revised and final. Totals for major categories may include subcategories not shown separately. Dashes indicate no data reported or data that do not meet publication criteria. CFOI fatal injury counts exclude illness-related deaths unless precipitated by an injury event.

¹ CFI has used several versions of the North American Industry Classification System (NAICS) since 2003 to define industry. For more information on the version of NAICS used in this year, see our definitions page at <http://www.bls.gov/iif/oshcfdef.htm>.

² Based on the BLS Occupational Injury and Illness Classification System (OIICS) 2.01 implemented for 2011 data forward.

³ Includes fatal injuries at all establishments categorized as Mining (Sector 21) in the North American Industry Classification System, including establishments not governed by the Mine Safety and Health Administration (MSHA) rules and reporting, such as those in Oil and Gas Extraction.

⁴ Includes fatal injuries to workers employed by governmental organizations regardless of industry.

Note: Data for all years are revised and final. Totals for major categories may include subcategories not shown separately. Dashes indicate no data reported or data that do not meet publication criteria. CFI fatal injury counts exclude illness-related deaths unless precipitated by an injury event.

¹ CFI has used several versions of the North American Industry Classification System (NAICS) since 2003 to define industry. For more information on the version of NAICS used in this year, see our definitions page at <http://www.bls.gov/iif/oshcdef.htm>.

² Based on the BLS Occupational Injury and Illness Classification System (OIICS) 2.01 implemented for 2011 data forward.

³ Includes fatal injuries at all establishments categorized as Mining (Sector 21) in the North American Industry Classification System, including establishments not governed by the Mine Safety and Health Administration (MSHA) rules and reporting, such as those in Oil and Gas Extraction.

⁴ The primary source of a fatal occupational injury is the object, substance, person, bodily motion, or exposure which most directly led to, produced, or inflicted the injury or illness.

⁵ The secondary source of a fatal occupational injury is the object, substance, person, or exposure, other than the source, if any, which most actively generated the source or contributed to the injury or illness.

Note: Data for all years are revised and final. Totals for major categories may include subcategories not shown separately. Dashes indicate no data reported or data that do not meet publication criteria. N.e.c. means "not elsewhere classified." CFI fatal injury counts exclude illness-related deaths unless precipitated by an injury event.

¹ CFOI has used several versions of the Standard Occupation Classification (SOC) system since 2003 to define occupation. For more information on the version of SOC used in this year, see our definitions page at <http://www.bls.gov/iif/oshcfdef.htm>.

² Based on the BLS Occupational Injury and Illness Classification System (OIICS) 2.01 implemented for 2011 data forward.

³ Includes violence by persons, self-inflicted injury, and attacks by animals.

⁴ Includes roadway, nonroadway, air, water, rail fatal occupational injuries, and fatal occupational injuries resulting from being struck by a vehicle.

⁵ Includes fatal injuries to persons identified as resident armed forces regardless of individual occupation listed.

Note: Data for all years are revised and final. Totals for major categories may include subcategories not shown separately. Dashes indicate no data reported or data that do not meet publication criteria. CFOI fatal injury counts exclude illness-related deaths unless precipitated by an injury event.

TABLE A-6. Fatal occupational injuries resulting from transportation incidents and homicides by occupation, Kentucky, 2016

Occupation ¹	Total fatal injuries (number)	Transportation incidents ²				Homicides ²	
		Total	Roadway incidents involving motorized land vehicle	Nonroadway incidents involving motorized land vehicles	Pedestrian vehicular incidents	Total	Shooting by other person--intentional
Molding, coremaking, and casting machine setters, operators, and tenders, metal and plastic	2	--	--	--	--	--	--
Woodworkers	1	1	1	--	--	--	--
Furniture finishers	1	1	1	--	--	--	--
Furniture finishers	1	1	1	--	--	--	--
Transportation and material moving occupations	29	26	18	--	7	--	--
Air transportation workers	1	1	--	--	--	--	--
Aircraft pilots and flight engineers	1	1	--	--	--	--	--
Commercial pilots	1	1	--	--	--	--	--
Motor vehicle operators	23	20	16	--	4	--	--
Driver/sales workers and truck drivers	21	19	15	--	4	--	--
Heavy and tractor-trailer truck drivers	18	16	12	--	4	--	--
Water transportation workers	1	1	1	--	--	--	--
Ship engineers	1	1	1	--	--	--	--
Ship engineers	1	1	1	--	--	--	--
Material moving workers	4	4	--	--	3	--	--
Laborers and material movers, hand	3	3	--	--	--	--	--

¹ CFI has used several versions of the Standard Occupation Classification (SOC) system since 2003 to define occupation. For more information on the version of SOC used in this year, see our definitions page at <http://www.bls.gov/iif/oshcdef.htm>.

² Based on the BLS Occupational Injury and Illness Classification System (OIICS) 2.01 implemented for 2011 data forward.

³ Includes fatal injuries to persons identified as resident armed forces regardless of individual occupation listed.

Note: Data for all years are revised and final. Totals for major categories may include subcategories not shown separately. Dashes indicate no data reported or data that do not meet publication criteria. CFI fatal injury counts exclude illness-related deaths unless precipitated by an injury event.

Table A-7. Fatal occupational injuries by worker characteristics and event or exposure, Kentucky, 2016

Worker characteristics	Total fatal injuries (number)	Event or exposure ¹					
		Transportation incidents ²	Violence and other injuries by persons or animals ³	Contact with objects and equipment	Falls, slips, trips	Exposure to harmful substances or environments	Fires and explosions
Native Hawaiian or Pacific Islander (non-Hispanic)	--	--	--	--	--	--	--

¹ Based on the BLS Occupational Injury and Illness Classification System (OIICS) 2.01 implemented for 2011 data forward.

² Includes roadway, nonroadway, air, water, rail fatal occupational injuries, and fatal occupational injuries resulting from being struck by a vehicle.

³ Includes violence by persons, self-inflicted injury, and attacks by animals.

⁴ May include volunteers and workers receiving other types of compensation.

⁵ Includes self-employed workers, owners of unincorporated businesses and farms, paid and unpaid family workers, and may include some owners of incorporated businesses or members of partnerships.

⁶ Persons identified as Hispanic or Latino may be of any race. The race categories shown exclude data for Hispanics and Latinos.

Note: Data for all years are revised and final. Totals for major categories may include subcategories not shown separately. Dashes indicate no data reported or data that do not meet publication criteria. CFI fatal injury counts exclude illness-related deaths unless precipitated by an injury event.

Ran off roadway	1	--	--	--	--	--	1	--	--	--
Nonroadway incident involving motorized land vehicles	3	--	--	--	--	1	--	1	--	--
Nonroadway noncollision incident	3	--	--	--	--	1	--	1	--	--
Jack-knifed or overturned, nonroadway	3	--	--	--	--	1	--	1	--	--
Fires and explosions	--	--	--	--	--	--	--	--	--	--
Fires	1	--	--	--	--	--	--	--	1	--
Forest or brush fire	1	--	--	--	--	--	--	--	1	--

TABLE A-8. Fatal occupational injuries by event or exposure and age, Kentucky, 2016

Event or exposure ¹	Total fatal injuries (number)	Age								
		Under 16 years	16-17 years	18-19 years	20-24 years	25-34 years	35-44 years	45-54 years	55-64 years	65 years and over
Falls, slips, trips	9	--	--	1	--	--	3	--	3	--
Falls to lower level	8	--	--	1	--	--	--	--	3	--
Fall through surface or existing opening	1	--	--	--	--	--	--	--	--	--
Fall through surface or existing opening 16 to 20 feet	1	--	--	--	--	--	--	--	--	--
Other fall to lower level	5	--	--	1	--	--	--	--	--	--
Other fall to lower level 6 to 10 feet	3	--	--	--	--	--	--	--	--	--
Other fall to lower level more than 30 feet	1	--	--	--	--	--	--	--	--	--
Exposure to harmful substances or environments	4	--	--	--	--	--	--	--	--	--
Exposure to electricity	2	--	--	--	2	--	--	--	--	--
Indirect exposure to electricity	2	--	--	--	2	--	--	--	--	--
Indirect exposure to electricity, greater than 220 volts	2	--	--	--	2	--	--	--	--	--
Contact with objects and equipment	19	--	--	--	1	3	4	4	3	4
Struck by object or equipment	16	--	--	--	--	3	3	4	3	3
Struck by powered vehicle--nontransport	4	--	--	--	--	--	--	--	--	1
Struck or run over by rolling powered vehicle	2	--	--	--	--	--	--	--	1	1
Struck by falling object or equipment--other than powered vehicle	10	--	--	--	--	3	3	--	--	--
Struck by object falling from vehicle or machinery--other than vehicle part	1	--	--	--	--	--	1	--	--	--
Caught in or compressed by equipment or objects	1	--	--	--	--	--	1	--	--	--
Struck, caught, or crushed in collapsing structure, equipment, or material	2	--	--	--	1	--	--	--	--	1
Excavation or trenching cave-in	1	--	--	--	1	--	--	--	--	--
Struck, caught, or crushed in other collapsing structure or equipment	1	--	--	--	--	--	--	--	--	1

¹ Based on the BLS Occupational Injury and Illness Classification System (OIICS) 2.01 implemented for 2011 data forward.

Note: Data for all years are revised and final. Totals for major categories may include subcategories not shown separately. Dashes indicate no data reported or data that do not meet publication criteria. N.e.c. means "not elsewhere classified." CFOI fatal injury counts exclude illness-related deaths unless precipitated by an injury event.
