## Section I: Management Leadership & Employee Involvement

### B. Management Commitment & Leadership

<table>
<thead>
<tr>
<th>Question</th>
<th>How Assessed</th>
</tr>
</thead>
<tbody>
<tr>
<td>B1. Does management overall demonstrate at least minimally effective, visible leadership with respect to the safety and health management system (as per FRN, VOL. 74, NO. 6, 01/09/09 page 936, IV. A.5. a-h)? Provide examples. <strong>MRG</strong></td>
<td>Yes or No</td>
</tr>
<tr>
<td>B2. How has the site communicated established policies and results-oriented goals and objectives for employee safety to employees?</td>
<td>Interview</td>
</tr>
<tr>
<td>B3. Do employees understand the goals and objectives for the safety and health management system?</td>
<td>Observation</td>
</tr>
<tr>
<td>B4. Are the safety and health management system goals and objectives meaningful and attainable? Provide examples supporting the meaningfulness and attainability (or lack thereof if answer is no) of the goal(s). (Attainability can either be unrealistic/realistic goals or poor/good implementation to achieve them.)</td>
<td>Doc Review</td>
</tr>
<tr>
<td>B5. How does the site measure its progress towards the safety and health management system goals and objectives? Provide examples.</td>
<td>Yes or No</td>
</tr>
</tbody>
</table>
### Section I: Management Leadership & Employee Involvement

#### C. Planning

<table>
<thead>
<tr>
<th></th>
<th>How does the site integrate planning for safety and health with its overall management planning process (for example, budget development, resource allocation, or training)?</th>
</tr>
</thead>
<tbody>
<tr>
<td>2</td>
<td>.permissions</td>

<tr>
<td></td>
<td>C2. Is safety and health effectively integrated into the site’s overall management planning process? If not, please explain.</td>
</tr>
<tr>
<td></td>
<td>.permissions</td>
</tr>
<tr>
<td></td>
<td>C3. For site-based construction sites, is safety included in the planning phase of each project?</td>
</tr>
<tr>
<td></td>
<td>.permissions</td>
</tr>
</tbody>
</table>
### Section I: Management Leadership & Employee Involvement

<table>
<thead>
<tr>
<th>D. Authority and Line Accountability</th>
<th>How Assessed</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>D1.</strong> Does top management accept ultimate responsibility for safety and health? (Top management acknowledges ultimate responsibility even if some safety and health functions are delegated to others.) If not, please explain.</td>
<td>MRØ</td>
</tr>
<tr>
<td><strong>D2.</strong> How is the assignment of authority and responsibility documented and communicated (for example, organization charts, job descriptions, etc.)?</td>
<td></td>
</tr>
<tr>
<td><strong>D3.</strong> Do the individuals assigned responsibility for safety and health have the authority to ensure that hazards are corrected or necessary changes to the safety and health management system are made? If not, please explain.</td>
<td>MRØ</td>
</tr>
<tr>
<td><strong>D4.</strong> How are managers, supervisors, and employees held accountable for meeting their responsibilities for workplace safety and health? (Are annual performance evaluations for managers and supervisors require?)</td>
<td></td>
</tr>
<tr>
<td><strong>D5.</strong> Are adequate resources (equipment, budget, or experts) dedicated to ensuring workplace safety and health? Provide examples.</td>
<td>MRØ</td>
</tr>
<tr>
<td><strong>D6.</strong> Is access to experts (for example, Certified Industrial Hygienists, Certified Safety Professionals, Occupational Nurses, or Engineers), reasonably available, based upon the nature, conditions, complexity, and hazards of the site? If so, under what arrangements and how often are they used?</td>
<td></td>
</tr>
</tbody>
</table>
**Section I: Management Leadership & Employee Involvement**

### E. Contract Employees

**E1.** Does the site utilize contractors? Please explain.

**E2.** Were there contractors/sub-contractors onsite at the time of the evaluation?

**E3.** When selecting onsite contractors/sub-contractors, how does the site evaluate the contractor’s safety and health management system and performance (including rates)?

**E4.** Are contractors and subcontractors required to maintain an effective safety and health management system and to comply with all applicable OSHA and company safety and health rules and regulations? If not, please explain.

**E5.** Does the site’s contractor program cover the prompt correction and control of hazards in the event that the contractor/sub-contractor fails to correct or control such hazards? Provide examples.

**E6.** How does the site document and communicate oversight, coordination, and enforcement of safety and health expectations to contractors?

**E7.** Have the contract provisions specifying penalties for safety and health issues been enforced, when appropriate? If not, please explain.

**E8.** How does the site monitor the quality of the safety and health protection of its contract employees?

**E9.** Do contract provisions for contractors require the periodic review and analysis of injury and illness data? Provide examples.

**E10.** If the contractors’ injury and illness rates are above the average for their industries, describe the site’s procedures that ensure that all employees are provided effective protection on the worksite? If yes, please explain.

**E11.** Based on your answers to the above items, is the contract oversight minimally effective for the nature of the site? (Inadequate oversight is indicated by significant hazards created by the contractor, employees exposed to hazards, or a lack of host audits.) If not, please explain.

**Section II: Worksite Analysis**

**A. Baseline Hazard Analysis**

<table>
<thead>
<tr>
<th></th>
<th>How Assessed</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Yes or No</td>
</tr>
</tbody>
</table>

A1. Has the site been at least minimally effective at identifying and documenting the common safety and health hazards associated with the site (such as those found in OSHA regulations, building standards, etc., and for which existing controls are well known)? If not, please explain.  

A2. What methods are used in the baseline hazard analysis to identify health hazards? (Please include examples of instances when initial screening and full-shift sampling were used. See FRN page 937, B.2.b)

A3. Does the company rely on historical data to evaluate health hazards on the worksite? If so, did the company identify any operations that differed significantly from past experience and conduct additional analysis such as sampling or monitoring to ensure employee protection? If so, please describe.

A4. Does the site have a documented sampling strategy used to identify health hazards and assess employees' exposure (including duration, route, and frequency of exposure), and the number of exposed employees? If not, please explain.

A5. Do sampling, testing, and analysis follow nationally recognized procedures? If not, please explain.

A6. Does the site compare sampling results to the minimum exposure limits or are more restrictive exposure limits (PELs, TLVs, etc.) used? Please explain.

A7. Does the baseline hazard analysis adequately identify hazards (including health) that need further analysis? If not, please explain. For site-based construction sites, does the hazard analysis include studies to identify potential employee hazards, phase analyses, task analyses, etc.?

A8. Does industrial hygiene sampling data, such as initial screening or full shift sampling data, indicate that records are being kept in logical order and include all sampling information (for example, sampling time, date, employee, job title, concentrated measures, and calculations)? If not, please explain the deficiencies and how they are being addressed.

A9. For site-based construction sites, are hazard analyses conducted to address safety and health for each phase of work?
### Section II: Worksite Analysis

**B. Hazard Analysis of Significant Changes**

<table>
<thead>
<tr>
<th>Question</th>
<th>Yes</th>
<th>Interview</th>
<th>Observation</th>
<th>Doc Review</th>
</tr>
</thead>
<tbody>
<tr>
<td>B1. When purchasing new materials or equipment, or implementing new processes, what types of analyses are performed to determine impact on safety and health, and are these analyses adequate?</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>B2. When implementing/introducing non-routine tasks, materials or equipment, or modifying processes, what types of analyses are performed to determine impact on safety and health, and are these analyses adequate?</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
### Section II: Worksite Analysis

#### C. Hazard Analysis of Routine Activities

| C1. Is there at least a minimally effective hazard analysis system in place for routine operations and activities? | MR≥ |
| C2. Does hazard identification and analysis address both safety and health hazards, if appropriate? If not, please explain. | |
| C3. What hazard analysis technique(s) are employed for routine operations and activities (e.g., job hazard analysis, HAZ-OPS, fault trees)? Please explain. | |
| C4. Are the results of the hazard analysis of routine activities adequately documented? If not, please explain. | |
| C5. For site-based construction sites, are hazard analyses conducted to address safety and health hazards for specialty trade contractors during each phase of work? | |

The table above outlines the criteria and methods for assessing the hazard analysis of routine activities, including the assessment methods such as interview, observation, and document review.
### D. Routine Inspections

<table>
<thead>
<tr>
<th></th>
<th>Question</th>
<th>How Assessed</th>
</tr>

#### A. Hazard Prevention and Control

<table>
<thead>
<tr>
<th>Question</th>
<th>Yes or No</th>
<th>Interview</th>
<th>Observation</th>
<th>Doc Review</th>
</tr>
</thead>
<tbody>
<tr>
<td>A1. Does the site select at least minimally effective controls to prevent exposing employees to hazards? MR</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>A2. When the site selects hazard controls, does it follow the preferred hierarchy (engineering controls, administrative controls, work practice controls [e.g., lockout/tagout, bloodborne pathogens, and confined space programs], and personal protective equipment) to eliminate or control hazards? Please provide examples, such as how exposures to health hazards were controlled.</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>A3. Describe any administrative controls used at the site to limit employee exposure to hazards (for example, job rotation).</td>
<td>X</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>A4. Do the work practice controls and administrative controls adequately address those hazards not covered by engineering controls? If not, please explain.</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>A5. Are the work practice controls (e.g., lockout/tagout, bloodborne pathogens, and confined space programs) recommended by hazard analyses implemented at the site? If not, please explain.</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>A6. Are follow-up studies (where appropriate) conducted to ensure that hazard controls were adequate? If not, please explain.</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>A7. Are hazard controls documented and addressed in appropriate procedures, safety and health rules, inspections, training, etc.? Provide examples.</td>
<td></td>
<td></td>
<td></td>
<td></td>

</tbody>
</table>
### Section III: Hazard Prevention and Control

#### Disciplinary System

A8. Are there written employee safety procedures including a disciplinary system? Describe the disciplinary system?

-  

A9. Has the disciplinary system been clearly communicated and enforced equally for both management and employees, when appropriate? If not, please explain.

-  

#### Emergency Procedures

A10. Does the site have minimally effective written procedures for emergencies? MR\(\Phi\)

-  

A11. Did the site explain the frequency and types of emergency drills held (including at least an evacuation drill annually)?

-  

A12. Is the emergency response plan updated as changes occur in the work areas e.g., evacuation routes or auditory systems?

-  

A13. Did the site describe the system used to verify all employees’ participation in at least one evacuation drill each year?

-  

#### Preventative/Predictive Maintenance

A14. Does the site have a written preventative/predictive maintenance system? If not, please explain.

-  

A15. Did the hazard identification and analysis (including manufacturers’ recommendations) identify hazards that could result if equipment is not maintained properly? If not, please explain.

-  

A16. Does the preventive maintenance system detect hazardous failures before they occur? If not, please explain. Is the preventive maintenance system adequate?

-  

#### Personal Protective Equipment (PPE)

A17. How does the site select Personal Protective Equipment (PPE)?

-  

A18. Did the site describe the PPE used at the site?

-  
### Section III: Hazard Prevention and Control

### Section III: Hazard Prevention and Control

#### B. Occupational Health Care Program

B1. Describe the occupational health care program (including availability of physician services, first aid, and CPR/AED) and special programs such as audiograms or other medical tests used.

-  

B2. How are licensed occupational health professionals used in the site’s hazard identification and analysis, early recognition and treatment of illness and injury, and the system for limiting the severity of harm that might result from workplace illness or injury? Is this use appropriate?

-  

B3. Is the occupational health program adequate for the size and location of the site, as well as the nature of hazards found here? If not, please explain.

-  

#### C. Recordkeeping

C1. Are OSHA required recordkeeping forms being maintained properly in terms of accuracy, form completion, etc.? If not, please explain. **MR**

- Yes upon review the records are being kept in the required format.

C2. Is the recordkeeper knowledgeable of 29 CFR 1904, OSHA’s recordkeeping standard? **MR**

- XXXX appear to have a good knowledge of the 1904 standard and interpretations.

C3. What records were reviewed to determine compliance with the recordkeeping standard?

- OSHA 300s, OSHA 300a’s, OSHA 301’s, first aid reports, first aid logs, medical records, accident investigations, report only to say as near miss reports.

C4. Do the injury and illness rates accurately reflect work performed by contractors/sub-contractors at the site evaluated? Please explain. **MR**

-  

C5. Was there any evidence of recordable injuries/illnesses not being reported due to management pressure, production concerns, incentive programs, etc.? If yes, please explain.

- No in the alternative they report more than is required at the present time in the notes.
### Section III: Hazard Prevention and Control

**Merit Goals:**

*(Include cross reference to section, subsection, and question, e.g., I.B2)*

1. 
2. 

**90-Day Items:** *(Delete this section for final transmittal to National Office)*

1. 
2. 

**Best Practices:**

1. 
2. 

**Comments including Recommendations:** *(optional)*

1. 
2. 

**Documents Referenced, Programs Reviewed:** *(optional)*

1. OSHA 300s, 301’s, and first reports of injury and illness, near miss records,
2. 

Section IV: Safety and Health Training

A. Safety and Health Training

<table>
<thead>
<tr>
<th>A1. What are the safety and health training requirements for managers, supervisors, employees, and contractors? Please explain.</th>
</tr>
</thead>
<tbody>
<tr>
<td>A2. Is the training delivered by qualified instructors?</td>
</tr>
<tr>
<td>A3. Does the training provided to managers, supervisors, and non-supervisory employees (including contract employees) adequately address safety and health hazards?</td>
